## **The ChemTRAC Program: Increasing public awareness of priority chemicals and reducing pollution from industrial and commercial sources**

Presentation to the  
*Occupational and Environmental  
Health Seminar*

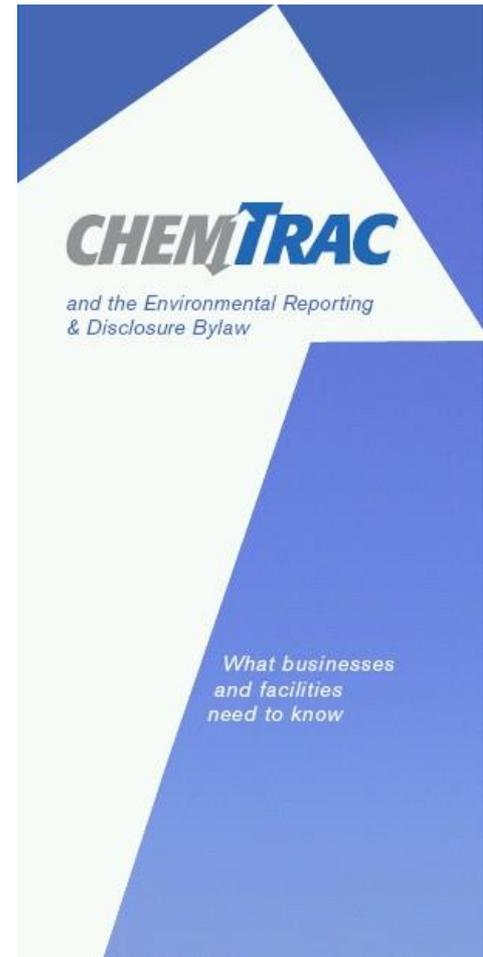

Toronto, Ontario, Canada  
March 18, 2016

Marco A. Belmont, PhD  
Health Research Specialist  
Toronto Public Health  
[mbelmon@toronto.ca](mailto:mbelmon@toronto.ca)

# Learning Objectives

- To learn what is the Environmental Reporting and Disclosure bylaw and the ChemTRAC program
- To identify the goals and elements of the ChemTRAC program
- To know how to access the data collected by ChemTRAC
- To understand the data collected by ChemTRAC

- Introduction
- Elements of ChemTRAC
- Sources of the ChemTRAC data
- Summary of the Data collected by ChemTRAC

# What's this?

- Toronto is the first municipality in Canada that developed a bylaw to collect and disclose information about use and releases of toxic chemicals by small and medium-size businesses

# Why? Because ...

- Air pollution is a concern in Toronto

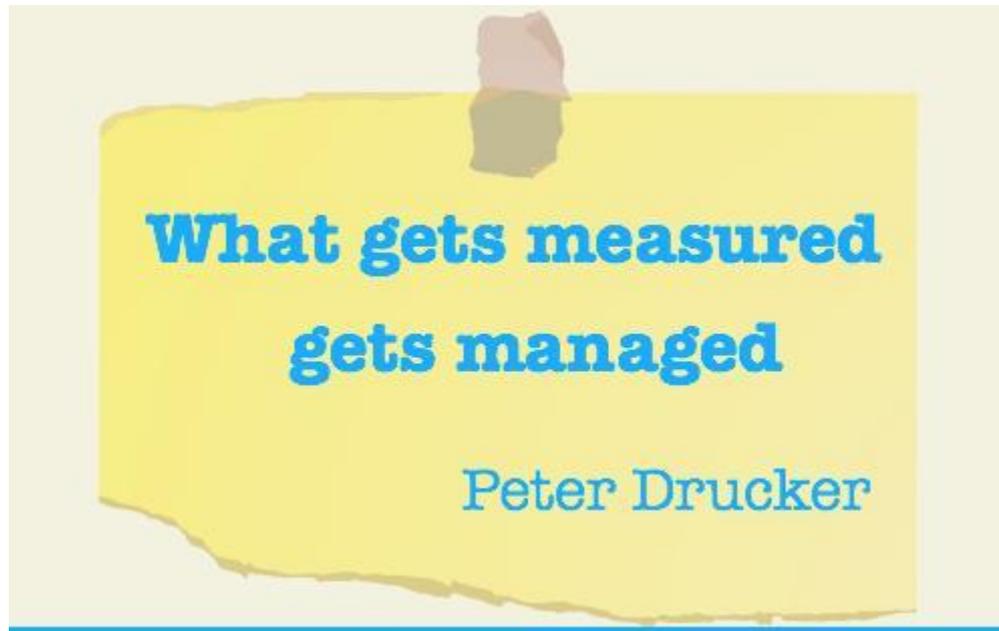

- There are many small and medium-size businesses that use and release toxic chemicals in Toronto but do not report this information to other government agencies
- Many small contributors of pollutants may be as important as a few large ones

# We needed to know ...

- The public demanded the 'Right to Know'

# ... to help drive change.

- Reporting environmental data and making information accessible benefits the public, workers, businesses and the City by:
  - Stimulating innovation and pollution prevention
  - Reducing exposure to toxic substances
  - Improving understanding of health and environmental risks

# Environmental Reporting and Disclosure Bylaw (Municipal Code Chapter 423)

First such municipal bylaw in Canada

Came into effect January 1, 2010

Requires annual reporting on 25 toxic substances

Reported data is available to public

Applies to hundreds of Toronto businesses

# ChemTRAC Goal and Objectives

## Goal:

- To protect health through reduced exposure to toxic substances.

## Objectives:

- Make facilities aware of their use & release of substances of health concern
- Collect information about hazardous substances used and released in the community and provide public access to it
- Stimulate pollution prevention, for example, through chemical substitution and improved processes
- Support “greening” and growth of local businesses

# 25 Priority Substances

Acetaldehyde

Acrolein

Benzene

1,3-butadiene

Cadmium

Carbon tetrachloride

Chloroform

Chromium (hexavalent)

Chromium (non-hexavalent)

1,4-dichlorobenzene

1,2-dichloroethane

Dichloromethane

Ethylene dibromide

Formaldehyde

Lead

Particulate Matter < 2.5 um (PM<sub>2.5</sub>)

Manganese

Mercury

Nickel

Nitrogen Oxides (NO<sub>x</sub>)

Polycyclic Aromatic Hydrocarbons (PAHs)

Tetrachloroethylene

Trichloroethylene

Vinyl Chloride

Volatile Organic Compounds (VOCs)

# Environmental Reporting & Disclosure Bylaw vs. NPRI

- Reporting threshold set at about 1% of current NPRI threshold to capture data from small & medium sized facilities which do not report
- There is no exemption based on number of employees
- Some reporting exemptions, similar to NPRI

# ChemTRAC program elements

## Data Reporting (Bylaw)

- Requires local facilities to annually track and report on the use and release of priority substances.

## Support Greening

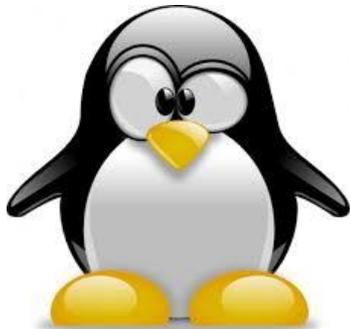

- Supports local facilities with green business practice strategies such as pollution prevention

## Public Disclosure

- Provides the public with information on the key chemicals in their community

# Public Data Disclosure

*Where can I find the  
ChemTRAC data?*

- ChemTRAC's Public Disclosure web site
  - Annual report
  - Interactive map
- Toronto Open data
  - Free to download

**IMPROVING TORONTO'S AIR  
2014 ANNUAL REPORT**

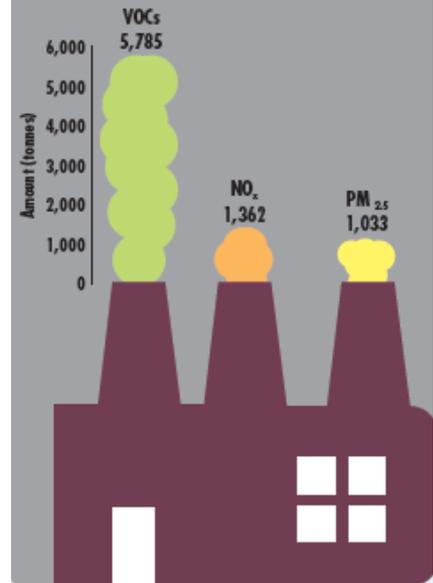

## Tracking and Reducing Chemicals in Toronto

4<sup>th</sup> Annual ChemTRAC Report

June 2015

### TOTAL RELEASES IN 2012

Air pollution causes health problems in Toronto and the top 3 most released substances - VOCs, NO<sub>x</sub> and PM<sub>2.5</sub> - are known contributors to smog formation.

# Interactive Map

Businesses Chemicals and Your Health Program Background Data Map

By Facility By Substance By Industry

## Facilities Reporting Use and Release of Priority Substances (Chemicals) [Print](#)

The data collected under Toronto's Environmental Reporting and Disclosure Bylaw enables us to better understand the nature of businesses in our city. With this data, ChemTRAC fills a gap in knowledge from national and provincial programs that require reporting from larger users. ChemTRAC helps to complete the picture by collecting information about smaller users and releases of 25 priority substances (chemicals) in Toronto.

[About the information on this site.](#)

Search by Address or Intersection     2013

**Note:** To minimize loading time, the map can only show 500 locations at a time. If you view the map at the city level, then it may appear that some data is missing. Just zoom into the neighbourhood you want to look at and you will be able to see all the facility icons.

**Legend:** ▲ - Reported Chemical Data ■ - Below Threshold ○ - Exempt

## Chemical Use and Release Report

[Print](#)

The Substance Report shows detailed chemical data, ordered by chemical, reported by facilities in a given year. By expanding the list under a particular chemical, you can see the data reported by an industry. Then, by expanding the list under a particular industry type, you can also see a list of facilities that reported using or releasing substances. Click on [i](#) for its definition and possible sources.

Municipal Code Chapter 423, Environmental Reporting and Disclosure By-law, requires that certain facilities that exceed the specified thresholds, report information each year about the use and release of 25 "priority substances" (as identified in the by-law [http://www.toronto.ca/legdocs/municode/1184\\_423.pdf](http://www.toronto.ca/legdocs/municode/1184_423.pdf)). These priority substances are found as contaminants in Toronto's environment (mostly air) and are of concern for health.

The by-law came into effect on January 1, 2010 and the first deadline for reporting of 2010 data was June 30, 2011.

This ChemTrac data set contains chemical tracking information submitted directly online by staff from each facility and includes the facility type, address, number of employees, contact information, use and release of priority substances.

Some companies that are below the thresholds volunteered the chemical use information, even though they are not legally obligated to disclose.

The purpose of disclosing the data is to inform the public of these facilities and encourage businesses and the public to pursue environmental improvements to reduce the use and release of these 25 "priority substances". The first dataset to be disclosed through Open Data will cover the year 2010.
